PROFESSIONAL SUMMARY

Results-driven AI & Backend Engineer with 5+ years of experience building scalable APIs, LLM-powered applications, and cloud-native backend systems. Specialized in FastAPI, Python, Generative AI, vector databases, OCR pipelines, and real-time AI chat systems. Experienced in deploying production-ready AI systems with Docker, Kubernetes, and AWS.

TECHNICAL SKILLS

Programming	Python, JavaScript, TypeScript, SQL
Backend	FastAPI, Flask, Node.js, REST APIs
AI/ML	LLMs, LangChain, RAG, Hugging Face, Gemini API
Databases	MongoDB, PostgreSQL, Pinecone, ChromaDB
DevOps	Docker, Kubernetes, GitHub Actions, AWS
Tools	VS Code, Git, Linux, Postman

PROFESSIONAL EXPERIENCE

Senior Backend Engineer — TechNova AI | 2023 – Present

- Built AI-powered resume parsing APIs using FastAPI and Pydantic.
- Integrated Gemini, OpenAI, and Hugging Face models into production systems.
- Reduced API latency by 40% using async processing and Redis caching.
- Designed scalable microservices architecture using Docker and Kubernetes.
- Developed RAG-based enterprise chatbot handling 100k+ requests monthly.

Software Engineer — CloudByte Solutions | 2021 – 2023

- Developed REST APIs and authentication systems for SaaS platforms.
- Implemented OCR pipelines for document extraction and validation.
- Automated deployment workflows using GitHub Actions and Docker.
- Collaborated with frontend teams to optimize API performance.

KEY PROJECTS

LLM Resume Parser

Built a PDF resume parser with FastAPI, OCR, and structured JSON extraction using Pydantic.

Enterprise AI Chatbot

Developed RAG chatbot with vector search and document retrieval using LangChain.

AI Coding Assistant

Created VS Code AI assistant with local LLM support and MCP tools integration.

EDUCATION

Bachelor of Technology (Computer Science)

XYZ University — 2021

CGPA: 8.7/10

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Machine Learning Specialization — Coursera
- Docker & Kubernetes Essentials
- Generative AI with Large Language Models
